

JOURNAL
OF
NEAR
INFRARED
SPECTROSCOPY

Instructions for authors

Did you know?

JNIRS is the only peer review journal dedicated to NIR spectroscopy.

There are NO page charges.

All papers are reviewed by acknowledged experts in NIR technology.

You are ensured that when your paper has been accepted, it will be published rapidly.

JNIRS is the global audience for your paper on any aspect of NIR spectroscopy, technology or its application.

You can submit your paper online at www.impublications.com/authors.

Aims and scope

JNIRS—Journal of Near Infrared Spectroscopy aims to publish original research papers, short communications, review articles and letters concerned with near infrared spectroscopy and technology, its application, new instrumentation and the use of chemometric and data handling techniques within NIR. *JNIRS* will accept contributions from all areas of applications where near infrared spectroscopy is in use, such as:

- | | |
|-------------------|---------------------|
| ■ Agriculture | ■ Chemical Industry |
| ■ Food | ■ Life Sciences |
| ■ Process Control | ■ Pharmaceuticals |
| ■ Textiles | ■ Polymers |
| ■ Wood | |

Topics for papers may include:

- | | |
|----------------------|------------------|
| ■ Chemometrics | ■ Calibrations |
| ■ Diffuse Reflection | ■ NIR Imaging |
| ■ On-Line Use | ■ Fibre Optics |
| ■ Sampling | ■ Spectroscopy |
| ■ Instrumentation | ■ Remote Sensing |

work should have been completed or a substantial and identifiable part of it should have been completed.

Short communications can be used to report significant results from incomplete work and to report completed work which does not require the full coverage of a research paper. Short communications should be restricted to 1500 words in length.

Review articles will normally be commissioned by the Editor or one of the Regional or Subject Editors. However, should you be interested in reviewing a particular area, you are welcome to discuss this with the Editor or your local Regional or Subject Editor. Review articles should provide a comprehensive coverage of the area reviewed with extensive references to published work.

Letters can either express the view of the author on a particular aspect of NIR spectroscopy and technology that they wish to comment on, or can very briefly report an interesting aspect of the author's work: perhaps details of a calibration or a sampling procedure.

Types of article

All articles should be written in English and will be subject to a refereeing process. Letters may be accepted for publication following review by the Editor or a Subject/Regional Editor alone.

Original research papers should report, in detail, the results of the author(s)'s work in a particular area of research. This

The manuscript

For the fastest review and publication, please submit your paper online at www.impublications.com/authors. If you prefer, an electronic version may be sent by e-mail or on CD-ROM to the Editor-in-Chief, the publishers or a Subject/Regional Editor.

It is important to remember that the manuscript is going to be read by referees. Please assist them by observing the following specification.

Use Times or Times New Roman with a font size of at least 12. The manuscript should be double line spaced with generous margins. Please number the pages and use the line number option if your word processor has it.

JNIRS is computer typeset and authors should include a computer-readable version of their manuscript—there is no need for any hard copy. This not only speeds up the publication of the article but also reduces the possibility for errors and reduces the proof reading burden for author and publisher alike. We can read most common PC word processor files.

We can also accept illustrations in computer readable form, such as PDF, TIFF, PCX or EPS format. Please ensure that the highest quality settings are used for their creation and that any fonts are embedded or converted to outlines. Bitmaps should be at least 300 dpi for tone images and at least 1200 dpi for line work. Please avoid JPGs, because they are a lossy format: each time you save a file as a JPG it loses quality. If you do not save with the highest quality settings, your figure will be very blurry.

Symbols, mathematics and formulae

This is an area where care should be exercised. You should use SI units whenever possible. Please use the following conventions: all symbols which are variables should be *italicised*, all constants should be normal (Roman) text and vectors and matrices should be **bold**.

Complex formulae can be prepared in equation editors, ideally MathType. Please note that we do not have the facility to process teX.

Units

Units of measurement should be separated from the number by a space. Please avoid the use of the solidus (/) or “per” and use a superscript ⁻¹, i.e. 5 mg L⁻¹, not 5 mg/L.

References

References should be cited in the text by a superscript Arabic number, i.e. spectroscopy,¹ and listed at the end of the article. Please give full bibliographical information, *including the title of all papers and book chapters*, as in the examples below:

For edited books:

1. G.D. Batten, A.B. Blakeney and C.R. Blatt, “Sample preparation procedures for use in near infrared analysis of fruit and vegetable crops”, in *Near Infrared Spectroscopy: The Future Waves*, Ed by A.M.C. Davies and P. Williams. NIR Publications, Chichester, p. 107 [1996].

For journals:

2. T. Næs, K. Kvaal, T. Isaksson and C. Miller, “Artificial neural networks in multivariate calibration”, *J. Near Infrared Spectrosc.* **1**, 1 (1993).

For authored books:

3. B. Osborne, T. Fearn and P.H. Hindle, *Practical NIR Spectroscopy with Applications in Food and Beverage Analysis*. Longman Scientific and Technical, Harlow, UK [1993].

It is the responsibility of the author to ensure that permission is obtained from the copyright holder to reproduce copyright material. The copyright holder is almost always the publisher of the work. Forms for this purpose are available from the Editor and from IM Publications. Copies of any signed Permission Forms should accompany the manuscript and the necessary wording of acknowledgement requested by the copyright holder should be included in the caption.

Abstract

A short abstract not exceeding 350 words should be included. This should describe the scope of the article and highlight any significant areas.

Keywords

Up to 10 Keywords should be included.

Illustrations

Illustrations must be produced ready for publication and meeting our guidelines set out above.

Labels on the axes should be clear and of sufficient size that they will be legible when reduced to fit on the page, i.e. a font size of at least 8pt when produced at one column width. (This requires a font size of at least 20pt if the figure is drawn full size on A4 paper. Note that ordinate and abscissa scales should be equal for equal values. Referees expect to see square plots of results of, for instance, “predicted” versus “reference method”. Please use Helvetica or Arial font. The amount of text on the illustration should be kept to a minimum. Keys for different line styles etc. should be given in the caption; not on the illustration.

Illustrations should be numbered in the text with Arabic numerals as Figure 1, Figure 4 and 5 etc.; they should be in a separate sequence from any tables. Captions should be provided for all figures and these should appear at the end of the manuscript.

If embedded in the word processor file, each illustration should be provided on a separate page as large as possible. Please label each page with the Figure number, author(s) and title of the paper.

Photographs can be published but they must be of good photographic quality and supplied as high quality images at a minimum of 300 dpi. Colour illustrations can only be included if the author meets the extra cost of their production. However, any illustrations can be reproduced in colour in the online edition at no cost and in black-and-white in print. If you include colour figures, this will happen automatically, so you must inform the Editor if you wish to pay for colour reproduction.

Tables

Tables should be numbered in a separate sequence from the illustrations as Table 1 etc. Please consider the size of the page when compiling your Table. Tables should not be split width-wise across pages, although if they exceed a page in length they can be continued on subsequent pages.

Tables should be provided on separate pages and not included in the text. Each Table should have a caption. As with illustrations, please number each sheet and include the author(s) and title of the paper.

Copyright

Authors are required to assign the copyright in their article to the Publisher. A completed and signed Copyright Form must be lodged with the Publisher before the article can be published.

If your institution or funding body requires that you deposit a copy of the paper in an open repository or you wish your paper to be freely available, we offer an "Open Access" publishing model. Please visit the journal's website (www.impublications.com/jnirs/) for more information. Please note that you should *not* request this until after your paper has been accepted for publication.

Submission of articles

Your article should be submitted via our online system at www.impublications.com/authors/. If you prefer, it may be sent to the Editor or one of the Regional Editors whose addresses appear below.

Please use the "Check List" at the end of these instructions before posting your article.

Receipt of the articles will be acknowledged, and the article will be subjected to a peer review process; should any amendments be necessary you will be asked to make these before the article is accepted for publication.

After acceptance, your article will be copy-edited, typeset and proofed to the first named author (unless otherwise requested). The proof should be checked carefully for typographical errors and to answer any questions raised by the Copy Editor. The proof stage is not an opportunity for the author to make changes to the article. Any significant changes from the original accepted manuscript may only be accepted on payment of the correction costs.

Addresses

EDITOR-IN-CHIEF: Professor Graeme D. Batten, Sea Spec Pty Ltd, PO Box 487, Woolgoolga, NSW 2456, Australia. Phone/Fax +61-266-562288. E-mail: thebattens@bigpond.com

Authors distant from Australia are welcome, if they prefer, to send their manuscript to IM Publications LLP, 6 Charlton Mill, Charlton, Chichester, West Sussex PO18 0HY, UK, who will be pleased to forward it to Graeme Batten.

EDITORS: Dr Franklin E. Barton, II, Light Light Solutions, LLC, PO Box 81486, Athens, GA 30608-1486, USA, E-mail: barton@lightlightsolutions.com. Dr G. Downey, Ashtown Food Research Centre, Ashtown, Dublin 15, Ireland, E-mail: gerard.downey@teagasc.ie. Professor T. Fearn, Department of Statistical Science, University College London, Gower Street, London WC1E 6BT, UK. E-mail: tom@stats.ucl.ac.uk. Professor S. Kawano, Kagoshima University, Japan. E-mail: kawano@agri.kagoshima-u.ac.jp. Mr K.H. Norris, Consultant, 11204 Montgomery Road, Beltsville, MD 20705, USA, E-mail: knnirs@gmail.com. Dr L. Weyer, ATK Elkton, 55 Thiokol Rd, Elkton, MD, USA. E-mail: lweyer2@verizon.net.

Check list

1. Are pages and lines numbered?
2. Is the text double line spaced?
3. Are illustrations prepared according to the instructions?
4. Is there an abstract?
5. Are there keywords?
6. Are all the figures refereed to in the text?
7. Are all the references refereed to in the text, and in numerical order according to their first citation?
8. Are the reference citations formed according to the instructions?
9. Are the tables prepared according to the instructions?
10. Have the equations been carefully checked?
11. Have you prepared text and illustration files in electronic format?
12. Are you prepared to pay for the cost of printing colour photographs or illustrations?
13. Is there a signed copyright form?
14. Have you provided full contact information: mailing address, telephone, fax number and e-mail address.
